

KHANT SITHU

SOFTWARE ENGINEER

I am Khant Sithu, a passionate and dedicated Full Stack Developer with a strong focus on frontend development. With expertise in React, Next.js, and Node.js, I bring ideas to life through code and deliver high-quality web applications. My goal is to create seamless user experiences and contribute to meaningful projects. With a strong foundation in computer science and a track record of successful projects, I am eager to continue honing my skills and exploring new opportunities in the software development industry.

EDUCATION

Bachelor of Science, Computer Science

University of The People (2022)

SKILLS

Front-end: React, Next.js, TailwindCSS, JavaScript, TypeScript, React Query, Redux, Zustand

Backend: Node.js, Express.js, Laravel, Java, Django / Django Restframework, Supabase, Firebase

Databases: MySQL, PostgreSQL, MongoDB

Other: Git, RESTful APIs, JWT, Docker, AWS

EXPERIENCES

Freelance Software Engineer

Upwork | 2023 - present

I have successfully built and deployed web applications that deliver seamless user experiences. My role involves collaborating closely with clients to understand their requirements, providing technical insights, and implementing robust solutions.

Volunteer at AIESEC In Myanmar

AIESEC In Myanmar | 2023 Feb - 2023 May

I collaborated with a team of dedicated individuals to execute strategic marketing campaigns and initiatives. During my tenure, I actively contributed to developing creative content, managing social media platforms, and promoting various events and projects.

PROJECTS

Tech Mart – Full-stack Ecommerce Web Application

Tech Mart is a full-stack ecommerce web application built with the MERN stack.

- Features: Browse available tech products, User Authentication, Cart functionality with rtk toolkit, Rate the product and Write product reviews, Payment integration with PayPal, Integrate checkout process with payment (deliver, paid, etc.), Admin page to manage product and delivery.
- Tech Stack: MERN Stack, Redux toolkit, rtk query, Bootstrap

Wild Oasis – Internal Application for Boutique Hotel

Wild Oasis is an internal application designed to manage bookings, cabins, and guest information for a boutique hotel.

- Features: Intuitive user interface, Powerful management tools, Integrates React, React Router, Styled Components, Recharts, React Query, and Supabase.

Fashion Fusion – Full Stack E-Commerce + Dashboard & Custom CMS

Fashion Fusion is a Full Stack E-Commerce + Dashboard & CMS that utilizes a Next.js 13 App Router, React, Tailwind, Prisma, MySQL, and Shadcn UI for Admin Dashboard, CMS, and API. It allows for the control of multiple vendors/stores through a single CMS, with individual API routes for each store. Other features include the management of categories, products, filters, and billboards, seamless order creation, secure payment processing with Stripe integration, and the ability to view orders, sales, and revenue data with graphical representation.

GameHub

GameHub is a web application designed to help you discover new and exciting video games. You can search for games based on different platforms, genres, and other criteria.

- Features: Browse games based on Genres, Platforms, Order by popularity etc. Check game rating, watch game trailers and Infinite Scroll more.
- Tech Stack: React, TypeScript, Chakra UI, React Query, Zustand, Axios

sithu.ai

The AI-Based App for Generating Music and Video

sithu.ai is an innovative app that combines Next.js 13, OpenAI API, and Replicate API to create music and video using cutting-edge technology. The app's tech stack includes Next.js, MySQL, Prisma, Clerk auth, Tailwind, and Shadcn, making it a robust and reliable platform for all your music and video needs.

Laravel Blog Project

The Laravel Blog Project is a feature-rich web application that showcases skills in

- backend development using Laravel PHP framework
- database management with MySQL
- integration of Mailchimp newsletter service.

Key features include user-friendly interface, Mailchimp integration, MySQL database management, user authentication, and responsive design. The project demonstrates the ability to integrate third-party services to enhance user engagement and expand the application's capabilities.
